

## Status of State PACE Programs

As of May 2013, 27 states have state-level purchase of agricultural conservation easement (PACE) programs. Four states—Arizona, Georgia, Hawaii and Missouri—have authorized PACE but do not yet have programs. Montana had a state-level program that was discontinued in 2003 when state authorization expired. This table displays the status and summarizes important information about farm and ranch land protection programs in 28 states that have funded easement acquisitions. For a program to be included, the protection of agricultural lands must be one of its core purposes, accomplished primarily by compensating landowners for the value of the easement.

Some programs (e.g., Delaware and Massachusetts) purchase and hold easements directly. Others also have the authority to acquire and co-hold easements with partners (e.g., county governments). A few programs (e.g., New York and Virginia) only provide grants to eligible entities, such as local governments and land trusts, to buy easements. In Alabama and New Mexico, the state’s role is limited to holding and monitoring easements; other entities execute the projects.

### EXPLANATION OF COLUMN HEADINGS

#### Year of Inception/ Year of First Acquisition

“Year of Inception” is the year in which the PACE program was authorized. “Year of First Acquisition” is the year in which the program acquired its first easement.

#### Easements or Restrictions Acquired

Number of agricultural conservation easements or conservation restrictions acquired through the state program. This number does not necessarily reflect the total number of farms/ranches protected because some programs acquire a property in stages and/or may hold multiple easements on the same farm/ranch. Some state programs do not hold easements but instead provide funds for easement purchases to local governments or land trusts.

#### Acres Protected

Number of acres protected by the program.

#### Land in Farms

Acres of land in farms as reported in the 2007 Census of Agriculture released by the United States Department of Agriculture’s National Agricultural Statistics Service (USDA-NASS). For the purposes of the Census of Agriculture, USDA-NASS defines a “farm” as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

### Program Funds Spent to Date

Dollars spent by each program to acquire easements on farms/ranches. This amount may include unspent funds dedicated for installment payments on completed projects. Unless otherwise noted, these figures do not reflect incidental land acquisition costs, such as appraisals, insurance and recording fees, or the administrative costs of running the program. These figures do not include additional funds contributed by federal programs, local governments (counties and municipalities), private land trusts, foundations and/or individuals.

### Additional Funds Spent to Date

Funds contributed toward state program acquisitions by federal programs, local governments, private land trusts, foundations and/or individuals (see “Funding Sources Used to Date”).
